W13-P4: 建立 supabase 資料庫

The screenshot shows a web application with a menu titled 'Our Menu - 211410039'. The menu has buttons for 'All', 'Dessert', 'Breakfast', 'Shakes', and 'Lunch'. The browser's developer console shows the 'fetch data' function being called, which returns an array of menu items. The data is as follows:

```

const fetchData = async () => {
  try {
    const response = await fetch(url, {
      method: 'GET',
      headers: {
        apikey: `${supabase_key}`,
        Authorization: `Bearer ${supabase_key}`
      }
    });
    const data = response.json();
    console.log('fetch data', data);
    return data;
  } catch (error) {
    console.log(error);
  }
}

window.addEventListener('DOMContentLoaded', async () => {
  menu = await fetchData();
  await displayMenuItems(menu);
  await displayMenuButtons();
});

```

The console output shows the following data structure:

```

[[{"id": 2, "title": "diner double", "category": "dessert", "price": 13.99, "local_img": "./menu/images/item-2.jpeg", "remote_img": "https://qmfqlvkbasmvmqhcirw.supabase.", "descrip": "Lorem ipsum dolor sit amet consectetur adipiscing elit.
