## W14-P3: Get products from url (https://course-api.com/javascript-store-products)

```javascript
const sectionCenter = document.querySelector('.products-container');
const url = 'https://course-api.com/javascript-store-products';

let menu;

const displayMenuItems = (menu)=>{
    let displayMenu = menu.map( (item) =>{

        return `
        <div class="single-product">
            <img
                src="${item.fields.image[0].url}"
                class="single-product-img img"
                alt="${item.fields.name}"
            />
            <footer>
                <h5 class="name">${item.fields.name}</h5>
                <span class="price">${item.fields.price}</span>
            </footer>
        </div>`
    });
    displayMenu = displayMenu.join('');
    sectionCenter.innerHTML = displayMenu;
}

const fetchData = async ()=>{
    try {
        const response = await fetch(url);
```
